OBJECTIVE

Creating intuitive, accessible, and high-performance applications that solve practical business challenges. Eager to contribute to an innovative team while continuously expanding expertise in emerging technologies, with the ultimate goal of advancing to a senior architecture role where I can mentor others and shape technical direction.

SKILLS

- **Frontend:** HTML5, CSS3, JavaScript, React.js, TailwindCSS, Axios, TanStack Query
- **Backend:** Express.js, Node.js, Firebase, JWT, MongoDB, MySQL, PHP
- **Languages:** Python, C++, C#
- **Tools & Patterns:** Git, GitHub, OOP, MVC, Linux

INTERPERSONAL SKILLS

- **Adaptability:** Quick to learn new frameworks, tools, and project requirements in fast-paced environments
- **Attention to Detail:** Ensure pixel-perfect implementation and maintain consistency with design systems
- **Problem-Solving:** Identify and resolve front-end bugs and usability issues proactively

PROJECTS

Product Recommendation Website
Live Link | Client Repo | Server Repo

Developed a platform that connects users seeking product recommendations. Users can create queries about products, share experiences, and get recommendations from the community.

- Improved app perfomance by lazy loading components.
- Authentication through email/password and social login.
- Implemented JWT based protected routes.
- Designed fully responsive UI with dark mode toggle

Tools: React, Node.js, Express, MongoDB, JWT, Tailwind CSS, Material-Tailwind

Sports Equipment Sport
Live Link | Client Repo | Server Repo

Developed an e-commerce application with focus on clean design and intuitive navigation. Users can browse, search and sort their desired products. Admins can add, update and delete products easily

- Implemented server-side searching and sorting.
- Designed a clean, informative dashboard.
- Designed responsive UI with WCAG compliant dark mode.
- Built CRUD functionality for managing products.

Tools: React, Node.js, Express, MongoDB, JWT, Tailwind CSS, Material-Tailwind
